ENVIRONMENTAL STATEMENT POLICY

Pembroke Design Limited recognise the need, through design and specification of materials, to reduce the impact that we as a Practice, and our industry has on the environment. We have a keen interest in sustainability issues, at all times aiming to design energy efficient, and socially responsible buildings.

It is our policy to conduct our business in an environmentally responsible manner wherever possible. We accept that concern for the environment and sustainability should influence the services provided by the Practice and be incorporated into those services.

In implementing the policy, we will wherever possible:-

- Ensure compliance, as a minimum standard, with all relevant environmental legislation.
- Wherever practical, comply with codes of practice and other requirements for example as specified by our Clients.
- Take environmental impact into account in the planning, design and implementation of our projects and contracts to help prevent pollution.
- Provide appropriate environmental training for our own staff, and promote environmental awareness amongst our suppliers and contractors.
- Balance economic wellbeing and prosperity with responsible management of the environment.
